

ONE DAY AWARENESS PROGRAM FOR SCHOOL & COLLEGE STUDENTS
“CYBER SECURITY & EMERGING TECHNOLOGIES”
&
INAUGURATION OF
BPO EXPERT and CAN COURSES
Under the project

“Capacity Building in IECT Including Training in Digital Skillsets and Current Industry Demanding Technologies for Various Section of Society in the NE States”

Implemented by
NIELIT Aizawl in collaboration with Dept. of Mizo, Govt. Hrangbana College

Funded by
Ministry of Electronics & Information Technology, Govt. of India

One Day Awareness Programme on Cyber Security & Emerging Technologies

Date: 3rd Feb 2023

Venue: Conference Hall, Govt. Hrangbana College

Organized by: Department of Mizo, GHBC

Collaboration: NIELIT, Aizawl

Funded by ministry of Electronics & Technology, Govt. of India

No of Participants: 119

CONTEXT

- The awareness programme on cyber security and emerging technologies is a timely and essential event that aims to address the growing concerns and challenges in the digital age. It aims to bring experts to explore the intersection of cybersecurity and emerging technologies and raise awareness about the evolving cyber threats and challenges presented by emerging technologies
- By exploring the latest threats and promoting best practices, the programme strives to strengthen digital defenses and ensure a safer digital environment for the participants. It would be a platform to discuss legal, ethical, and policy considerations surrounding cyber security and emerging technologies.
- The programme includes a training session that will enable the participants to acquire new skills and enhance their cybersecurity knowledge

OUTCOME

- The programme successfully raised awareness about the evolving cyber threats and challenges presented by emerging technologies. Through expert presentations and discussions, participants gained valuable insights into potential vulnerabilities, cyber-attacks and the need for proactive security measures.
- The participants engaged in in-depth discussions, examining the impact of technology on privacy, data protection, regulation, etc. Through hands-on activities, the participants gained practical experience in threat detection, incident response, secure coding, and data protection.
- Through the skill, expertise and knowledge of the experts, the participants gained a rich pool of knowledge and actionable strategies to safeguard digital systems and assets in the face of the evolving cyber threats.
